Subject and Author Index to Volume 31

Abdomen, open, enteral nutrition for trauma patients with, 410
Abstracts, from Clinical Nutrition Week 2007, S1 (Mar–Apr)
Achalasia, Wernicke's encephalopathy after surgical treatment for, 324
Acidosis, metabolic, PN with amino acids in premature infants and, 278
Active hexose correlated compound (AHCC), INOS production in hepatocytes and, 373
Adults, home PN support in, 306
Advanced glycation end products, food, inflammation and, 430
Advanced lipoxidation end products, food, inflammation and, 430
Aged
  long-term intermittent glutamine treatment and well-being in, 456
  muscle glutamine synthesis response to fasting, and glutamine supplementation in, 26
Alanine-glutamine dipeptide (AGD), inflammation-related genes expression in hemorrhagic shock and, 32
Amino acids, PN with, metabolic acidosis in premature infants and, 278
Ammonia, serum levels of, supplemental arginine in CB6F1 mice and, 101
Antibiotics, inflammation and body weight loss in rat model of short bowel syndrome and, 397
Antioxidants
  enteral diet enriched by, lipopolysaccharide-induced septic shock in mice and, 181
  optimizing dose of, in critically ill patients, 109
Arachidonic acid, docosahexaenoic acid supplementation in cirrhotic patients awaiting liver transplantation and, 511
Arginine
  administration route and conversion of isotopically labeled l-[2-^{15t}N] glutamine, conversion in humans into, 343
  supplemental, in CB6F1 mice, endotoxemia and, 101
ASCT2, in ischemic injury, 86
Asians, adults, home PN support in, 306
A.S.P.E.N.
  historical review and future of, 156 (Editorial)
  Presidential Address, 334
  Statement on Parenteral Nutrition Standardization, 441

Bioelectric impedance analysis (BIA), estimation of body fat mass in HIV-positive men receiving HAART using, 135
Biofilm, protegrin IB-367 pretreatment in animal models of central venous catheter infection and, 463
Body mass index, as nutrition risk indicator in children with cancer, 53
Body weight. *See* Weight loss
Bombesin, atrophy of Peyer's Patches and M cells dysfunction in rabbits on long-term PN and, 75
Bone disease, proinflammatory state with intestinal failure and, 142

Cachexia, pyrrolidine dithiocarbamate prevention in colon 26 tumor-bearing mice of, 18
Cancer
  advanced, PN effects on survival with gastrointestinal obstruction in, 508
  children with, body mass index as nutrition risk indicator in, 53
  pyrrolidine dithiocarbamate prevention of cachexia in colon 26 tumor-bearing mice, 18
  wearable device for assessing energy expenditure in, pilot validation of, 502
Cardiac surgery, glycine effects in perioperative oral immune-enhancing nutrition supplements in, 173
Catheters
  central venous access
    for long-term PN, tip position of, 382
    protegrin IB-367 pretreatment in animal models of infection in, biofilm and linezolid therapeutic efficacy and, 463
  risk factors for bloodstream infections related to, 284
Cell apoptosis, glutamine administration after hemorrhagic shock and, 94
Children. *See also* Infants
  with cancer, body mass index as nutrition risk indicator in, 53
  hematopoietic stem cell transplantation in, prognostic factors in oral dietary intake after, 295
Cholestasis, PN-associated, protein/nonprotein caloric intake effects in premature infants weighing 600–1000 grams on, 487
Citrulline
  administration route and conversion of isotopically labeled l-[2-^{15t}N] glutamine, conversion in humans into, 343
  plasma levels of, as biomarkers of intestinal absorptive function in short bowel syndrome, 1
Clostridia, piglets fed with lactulose and cecal densities of, 194
Colon, PEG misplacement into, 469
Critically ill patients
  dose of glutamine dipeptides and antioxidants in, 109
  moderate to severe acute hypocalcemia in, treatment of, 228
  resting energy expenditure during mechanical ventilation of, lesion type and, 58
Cysteamine, INOS induction in hepatocytes and, 366
Cysteine, pharmacokinetic parameters of omeprazole in rats with protein-calorie malnutrition, 37

Dexamethasone, rats treated with, parenteral fish-oil emulsion effects on cutaneous wound healing in, 161
Diabetes, in elderly, enteral feeding and metabolic outcome for, 320
Dietary formulations
  for long-term PN, trace elements in, 388
  various, for enteral nutrition, metabolic outcome of, 320
Diethylhexylphthalate (DEHP), extracted by newborn lipid emulsions from polyvinylchloride infusion systems, changes in rabbit liver histology and, 188
Docosahexaenoic acid, arachidonic acid supplementation in cirrhotic patients awaiting liver transplantation and, 511
Dual energy X-ray absorptiometry (DEXA), estimation of body fat mass in HIV-positive men receiving HAART using, 135

Elderly, diabetes in, enteral feeding and metabolic outcome for, 320
Endotoxemia, supplemental arginine in CB6F1 mice and, 101
Energy expenditure. *See also* Resting energy expenditure
  assessment in cancer patients, pilot validation of new wearable device for, 502
Enteral nutrition (EN)
  antioxidative nutrient-rich, lipopolysaccharide-induced septic shock in mice and, 181
  different formulas for, metabolic outcome of, 320
  early, synbiotics, prebiotics, glutamine, or peptide for trauma patients on, 119
  glycemic index of, fiber and, 491
  isotopically labeled l-[2-^{15t}N]glutamine, conversion into citrulline and arginine in humans via parenteral nutrition vs., 343
  lactulose feeding, cecal densities in clostridia in piglets and, 194
  long-term home, tube- and feeding-related complications in, 274
  lymphotoxic β receptor and pulmonary but not intestinal mucosal immunity with, 477
  parenteral nutrition effect on intestinal polymeric immunoglobulin receptor vs., 351
  structural underfeeding due to inaccurate feeding pumps for, 154 (Letter and Letter reply)
  for trauma patients with open abdomen, 410
Ethanol lock therapy, catheter-related bloodstream infections in home PN patients and, 302
Evidence-based medicine, nutrition and, 341 (Editorial)

Fasting
  by aged rats, long-term intermittent glutamine treatment and well-being of, 456
  MAdCAM-1 mRNA in Peyer's patches of mice and, 47
Fatty acids
  postabsorptive plasma homeostasis of, in sickle cell disease, 263
  ω-3 supplementation in PN, phospholipid fatty acid pattern and, 12
Feeding pump systems, inaccurate, structural underfeeding due to, 154 (Letter and Letter reply)
Feeding tubes
  clinical cost of placement of, 269
  long-term complications of, 274
Fiber, glycemic index of enteral nutrition and, 491
Fish oil
  emulsion in PN, cutaneous wound healing in rats on dexamethasone and, 161
  influence on GALT, 416
Food
  advanced glycation and lipoxidation end products, inflammation and, 430
  emotional aspects in meaning of, 334

Gangliosides, dietary, *in vitro* glucose uptake in weanling rats and, 423
Gastric cancer, PN effects on tumor proliferation in malnourished patients with, 451

Gastric residual volume (GRV), gastric contents measurement by refractometry and, 63
Gastrointestinal surgery, infusion of long-chain triglycerides and immune function during, 167
Gastrostomy. *See* Percutaneous endoscopic gastrostomy
Genes expression, inflammation-related, in hemorrhagic shock, AGD and, 32
Glucose, *in vitro* uptake in weanling rats of, dietary gangliosides and, 423
Glutamine
  administration after hemorrhagic shock, 94
  in early EN for trauma patients, synbiotics, prebiotics, or peptide vs., 119
  isotopically labeled, administration route and conversion into citrulline and arginine in humans of, 343
  long-term intermittent treatment in very old rats of, 456
  optimizing dose of, in critically ill patients, 109
  plasma levels of, as biomarkers of intestinal absorptive function in short bowel syndrome, 1
  supplementation, muscle glutamine synthesis response to fasting in muscle in adult and very old rats, 26
Glutamine transporter ASCT2, in ischemic injury, 86
Glutathione
  PN-induced hepatocyte injury in infant rabbits and, 199
Glycemic index, of enteral nutrition, fiber and, 491
Glycine, effects of perioperative oral immune-enhancing nutrition supplements in high-risk cardiac surgery patients of, 173
Growth hormone, PN with/without, GH/IGF1 axis after hepatectomy in hepatocellular carcinoma with liver cirrhosis and, 496
Growth hormone/insulin-like growth factor-1 axis, after hepatectomy in hepatocellular carcinoma with liver cirrhosis, PN with/without GH effects on, 496
Gut, mucosal immunity in humans and, 246
Gut-associated lymphoid tissue (GALT), fish oil in PN and, 416
Health care
  reform options, 72 (Editorial)
  shortages of health professionals and, 449 (Editorial)
Health care costs, feeding tube placement and, 269
Health personnel, health care and shortages of, 449 (Editorial)
Hemorrhagic shock
  AGD and inflammation-related genes expression in, 32
  glutamine administration after, 94
Hepatocellular carcinoma, with liver cirrhosis, PN with/without GH effects on GH/IGF1 axis after hepatectomy in, 496
Hepatocytes
  AHCC effect on INOS production in, 373
  cysteamine effect on INOS induction in, 366
Highly active antiretroviral therapy (HAART), estimation of body fat mass in HIV-positive men on, 135
History of medicine, on short bowel syndrome management, 326
HIV, estimation of body fat mass using DEXA and BIA in men receiving HAART with, 135
Home enteral nutrition, long-term, tube- and feeding-related complications in, 274
Home parenteral nutrition
  for adults, Asian medical center's support for, 306
  ethanol lock therapy and catheter-related bloodstream infections in, 302
  in rural areas of Ontario, Canada, telehealth videoconferencing care for, 234
  twenty-nine years of living with short bowel syndrome and, 127
Hospitals, subjective global nutritional status assessment for, 406
Hypocalcemia, moderate to severe acute, treatment in critically ill trauma patients for, 228

Immune function
  infusion of long-chain triglycerides and, 167
  intestinal mucosal, lymphotoxic β receptor blockade effects on, 358
  mucosal, in humans, gut effects on, 246
Inducible nitric oxide synthase (INOS)
  active hexose correlated compound effect on production in hepatocytes of, 373
  cysteamine effect on induction in hepatocytes of, 366
Infants
  dietary gangliosides and *in vitro* glucose uptake in rat model of, 423
  neonatal, dietary protein absorption of small intestine in, 482
  premature
    parenteral amino acid and metabolic acidosis in, 278
    weighing 600–1000 grams, protein/nonprotein caloric intake effects on PN-associated cholestasis in, 487
Infections
  bloodstream, risk factors for, PN catheterization and, 284
  catheter-related bloodstream, ethanol lock therapy in home PN patients and, 302
  central venous catheter, protegrin IB-367 pretreatment effects on biofilm and therapeutic efficacy of linezolid in animal models of, 463
Inflammation
  food effects on advanced glycation and lipoxidation end products in development of, 430
  genes expression in hemorrhagic shock, AGD and, 32
  intestinal failure and bone disease with, 142
  in rat model of short bowel syndrome, antibiotics and, 397
  ω-3 fatty acids supplementation in PN and, 12
Inflammatory bowel disease, nutrition assessment of patients with, 311
Intensive care units
  neurosurgical, PEG in, 517
  structural underfeeding due to inaccurate enteral nutrition feeding pumps in, 154 (Letter and Letter reply)
Intestinal absorption
  of dietary protein in human neonates, 482
  in short bowel syndrome, plasma citrulline and glutamine as biomarkers of, 1
Intestinal failure, proinflammatory state with, bone disease and, 142
Ischemia, intestinal, glutamine transporter ASCT2 and, 86

Kidney transplantation, or pancreas/kidney transplantation, use of PN in, 8

Lactulose, cecal densities of clostridia in piglets fed with, 194
Linezolid, for central venous catheter infection, protegrin IB-367 pretreatment effects on biofilm and therapeutic efficacy in animal models of, 463
Lipids
  20% injectable emulsions, stability in glass vs. plastic syringes, 142
  metabolism of, sickle cell disease and, 263
Liver cirrhosis
  arachidonic acid plus docosahexaenoic acid supplementation in patients awaiting liver transplantation due to, 511
  PN with/without GH effects on GH/IGF1 axis after hepatectomy in hepatocellular carcinoma with, 496
Liver damage
  DEHP extracted by newborn lipid emulsions from PVC infusion systems and, 188
  PN-induced, glutathione in infant rabbits and, 199
Lymphotoxic β receptor
  blockade, intestinal mucosal immunity and, 358
  pulmonary vs. intestinal mucosal immunity with enteral feeding and, 477

Malnutrition
  in gastric cancer patients, PN effects on tumor proliferation with, 451
  inflammatory bowel disease and, 311
  pressure ulcers and, 288
M cells, dysfunction in rabbits on long-term PN, bombesin and, 75
Medicaid reform, options for, 72 (Editorial)
Medicare reform, options for, 72 (Editorial)
Mortality, early postprocedure, multidisciplinary clinical nutrition team assessment before PEG placement and, 205
Mucosal addressin cellular adhesion molecule-1 (MAdCAM-1) mRNA, PN and fasting effects in Peyer's patches of mice on, 47
Mucosal immunity
  in humans, gut effects on, 246
  intestinal, lymphotoxic β receptor blockade effects on, 358
  pulmonary vs. intestinal, enteral feeding and lymphotoxic β receptor effects on, 477
Muscle, glutamine synthesis response to fasting in adult and very old rats in, glutamine supplementation and, 26

Neonates. *See* Infants, neonatal
Neurosurgical ICU, PEG in, 517
Nutrition status
  inflammatory bowel disease and, 311
  pressure ulcers and, 288
  subjective global assessment of, 406
Nutrition support
  emotional aspects in meaning of food and, 334
  evidence-based medicine and, 341 (Editorial)
  immune-enhancing, in high-risk cardiac surgery patients, glycine and, 173
  PEG misplacement into colon and, 469
  standards for, A.S.P.E.N. and, 156 (Editorial)
Nutrition team assessment, before PEG placement, early postprocedure mortality and, 205

Obesity
  PEG placement and, 212
  in women, predicting energy expenditure in, 217
Omeprazole, in rats with protein-calorie malnutrition, oral cysteine supplementation and, 37
Oral diet, prognostic factors in resumption of after hematopoietic stem cell transplantation in children, 295

Overweight patients, PEG placement in, 212

Pancreas/kidney transplantation, use of PN in, 8
Parenteral nutrition (PN). *See also* Home parenteral nutrition
with amino acids, metabolic acidosis in premature infants and, 278
A.S.P.E.N. Statement on Standardization of, 441
cholestasis due to, protein/nonprotein caloric intake effects in premature infants weighing 600–1000 grams on, 487
enteral nutrition effect on intestinal polymeric immunoglobulin receptor vs., 351
fish-oil emulsion effects on cutaneous wound healing in rats on dexamethasone, 161
fish oil in, GALT and, 416
glutathione and hepatocyte injury in infant rabbits induced by, 199
isotopically labeled l-[2-^{15}N]glutamine, conversion into citrulline and arginine in humans via enteral nutrition vs., 343
kidney or pancreas/kidney transplantation and use of, 8
liver damage and DEHP extracted by newborn lipid emulsions from PVC infusion systems for, 188
long-term, bombesin effects on atrophy of Peyer's Patches and M cells dysfunction in rabbits on, 75
long-term, tip position of central venous access devices for, 382
long-term, trace elements in, 388
MAdCAM-1 mRNA in Peyer's patches of mice and, 47
risk factors for catheter-related bloodstream infections, 284
supplementation of ω-3 fatty acids and phospholipid fatty acid pattern in, 12
survival with malignant gastrointestinal obstruction and, 508
tumor proliferation in malnourished gastric cancer patients and, 451
Wernicke's encephalopathy during, 69
with/without GH, GH/IGF1 axis after hepatectomy in hepatocellular carcinoma with liver cirrhosis and, 496
Peptide diet, in early EN for trauma patients, synbiotics, prebiotics, or glutamine vs., 119
Percutaneous endoscopic gastrostomy (PEG)
long-term complications of, 274
misplacement into colon, 469
multidisciplinary clinical nutrition team assessment before placement of, early postprocedure mortality and, 205
in neurosurgical ICU, 517
placement in overweight and obese patients, 212
Polymeric immunoglobulin receptor, intestinal, type and route of nutrition and, 351
Prebiotics, in early EN for trauma patients, synbiotics, glutamine, or peptide vs., 119
Premature infants. *See* Infants, premature
Presidential Address
Food for Thought: It's More Than Nutrition, 334
Pressure ulcers, nutrition status and, 288
Protegrin IB-367, pretreatment in animal models of central venous catheter infection, effects on biofilm and linezolid therapeutic efficacy with, 463
Protein, dietary
absorption by small intestine in human neonates of, 482
ratio of nonprotein caloric intake in premature infants weighing 600–1000 grams to, PN-associated cholestasis and, 487
Protein-calorie malnutrition, pharmacokinetic parameters of omeprazole in rat model of, oral cysteine supplementation and, 37
Pyrrolidine dithiocarbamate, cancer cachexia prevention in colon 26 tumor-bearing mice by, 18

Refractometry, gastric contents measurement by, gastric residual volume and, 63
Resting energy expenditure. *See also* Energy expenditure
during mechanical ventilation in critically ill patients, lesion type and, 58
prediction in extremely obese women, 217
